

Sustainability Statement Samples

(Company) vision is to be viewed (internally and externally) as an innovative GREEN company because of its distinctive ability to provide GREEN solutions to its clients through effective use of technology and other GREEN building practices and procedures.

To learn, practice and teach green/sustainable design and construction as a core responsibility.

(Company) is committed to minimizing the impact of the construction business on the environment and encouraging sustainable practices within the company.

(Company) strives to tread lightly on the planet by minimizing the natural resources we consume during our normal operations and continuously reducing the amount of waste we generate. We encourage creative, forward-thinking ideas that will improve the efficiency of the construction process and the advancement of new building technologies. (Company) will invest in employee development to deliver the most efficient, sustainable construction projects for our clients.
