

ABC Green Building Toolbox Talks

**ENLIGHTEN.
EDUCATE.
ENHANCE.**

GreenConstructionAtWork.com

With ABC's series of
Green Building Toolbox Talks,
your company's field
supervisors can enlighten
and educate employees on
green construction practices,
as well as enhance their
jobsite training.

Green Building Toolbox Talks

The comprehensive program includes everything needed to get started.

- Set of 52, 15-minute, printable, online PDFs for use as Toolbox Talks on construction sites
- “Train the Trainer” online education modules to equip supervisors and foremen with the skills to present Toolbox Talks on the jobsite.

The Toolbox Talks are easy to understand and follow because they correlate with

PHASE OF CONSTRUCTION

Pre-Construction

Early Construction

AREA OF CONSTRUCTION

Building Sitework

General

Categories

Benefits

Your employees will gain a better understanding of green construction practices associated with LEED® certification, improving productivity and profitability.

Educate craft workers and front-line supervisors about green construction principles

Understand the impact contractors have on a green building project

Learn how to implement green construction practices in the field

Understand owners' green building goals and how contractors can support the owner

Enhance leadership skills of supervisors and foremen and increase morale among employees

Continuing Education (CEs)

ABC's Green Building Toolbox Talks can be submitted to the Green Building Certification Institute (GBCI) for continuing education hours for **LEED APs** and **Green Associates** seeking credential maintenance. The Toolbox Talks qualify as live presentations.

with project timelines.
